Question No. 1

You have a Microsoft ASP.NET web application.

You need to store a value that can be shared across users on the server.

Which type of state management should you use?

- **A.** session
- **B.** application
- **C.** cookies
- **D.** ViewState

Answer: A

Question No. 2

This question requires that you evaluate the underlined text to determine if it is correct.

The Response.Redirect method is used to transfer processing of the current page to a new page, and then return processing back to the calling page once processing of the new page has completed.

Select the correct answer if the underlined text does not make the statement correct. Select "No change is needed" if the underlined text makes the statement correct.

- **A.** No change is needed
- **B.** Server.Transfer method
- **C.** Server.Execute method
- **D.** meta http-equiv="refresh" tag

Answer: C

Question No. 3

This question requires that you evaluate the underlined text to determine if it is correct.

When a base class declares a method as virtual, the method is hidden from implementation by a derived class.

Select the correct answer if the underlined text does not make the statement correct. Select "No change is needed" if the underlined text makes the statement correct.

- **A.** No change is needed
- **B.** can be overridden with its own implementation by a derived class
- **C.** must be overridden in any non-abstract class that directly inherits from that class
- **D.** cannot be overridden with its own implementation by a derived class

Answer: B

Question No. 4

Which three items are benefits of encapsulation? (Choose three.)

- **A.** restricted access
- **B.** flexibility

- C. maintainability
- D. performance
- E. inheritance

Answer: A, B, C

Question No. 5

You plan to create an application for your company. The application will run automated routines and write the results to a text-based log file. Little or no user interaction is required.

Security requirements on the host computers prevent you from running applications on startup, and users must be able to see the status easily on the screen. The host computers also have limited memory and monitors that display only two colors. These computers will have no network connectivity.

Which type of application should you use for this environment?

- A. Windows Store app
- B. console-based
- C. DirectX
- D. Windows Service

Answer: A
