Question No. 1

A company has two development instances, two test instances, two staging instances, and one production instance.

The test team reports connection issues with the test and staging instances.

You need to identify which of the instances the testing team currently has access.

Which two URLs can you use? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- **A.** https://globaldisco.crm.dynamics.com/api/discovery/v9.1/instances
- **B.** https://myorg.api.crm.dynamics.com/api/data/v9.1/
- **C.** https://dev.crm.dynamics.com/api/discovery/v9.1/instances
- **D.** https://disco.crm.dynamics.com/api/discovery/v9.1/
- **E.** https://dev.crm.dynamics.com/api/discovery/v9.1/instances(UniqueName='myorg')

Answer: C, E

Question No. 2

You are a Dynamics 365 developer working on a model-driven app.

You add a button to an entity form and to the view for the entity that calls a JavaScript function. When you click the button, it results in an error.

You determine that the JavaScript function is calling another JavaScript function in a different web resource.

You need to resolve the error.

What should you do?

- **A.** In the JavaScript web resource, add the missing web resource as a dependency.
- **B.** Add &ribbondebug=true to the app URL and run the Command Checker tool.
- **C.** From the Ribbon Workbench, add the missing JavaScript web resource as a CustomRule in EnableRules.

Answer: C

Question No. 3

You are creating a custom connector in Power Apps to connect to a third-party application.

The definition in the connector must be set so that it is not visible to the end user.

You need to select the appropriate visibility parameter.

Which parameter should you use?

- **A.** important
- **B.** none
- **C.** internal

- **D.** advanced

Answer: C

Question No. 4

A customer wants to design a complex business process flow that includes six custom entities and four stages for each entity. One of the stages will have 15 steps.

You need to explain the flaw in this design to the customer.

What is the flaw in this design?

- **A.** The maximum number of custom entities has been exceeded.
- **B.** The maximum number of steps for a stage has been exceeded.
- **C.** The maximum number of stages for an entity has been exceeded.
- **D.** The minimum number of stages for an entity has not been met.
- **E.** The minimum number of steps for a stage has not been met.

Answer: A

Question No. 5

A company implements Dynamics 365 Supply Chain Management.

The company wants a button to display in the command bar when viewing accounts.

You need to add the button using the Ribbon Workbench.

In which three areas can you add a button for the Account entity? Each correct answer presents a complete

solution.

NOTE: Each correct selection is worth one point.

- **A.** In the home area for Accounts.
- **B.** In the main body of a form.
- **C.** On the main application window.
- **D.** On the associated view of the account.
- **E.** On the Account form.

Answer: A, D, E
