Question No. 1

Your company uses Azure DevOps for the build pipelines and deployment pipelines of Java-based projects.

You need to recommend a strategy for managing technical debt.

Which action should you include in the recommendation?

- **A.** Configure post-deployment approvals in the deployment pipeline.
- **B.** Integrate Azure DevOps and SonarQube.
- **C.** Integrate Azure DevOps and Azure DevTest Labs.

Answer: B

Question No. 2

You have an Azure DevOps project that contains a release pipeline and a Git repository.

When a new code revision is committed to the repository, a build and release is triggered.

You need to ensure that release information for the pipeline is added automatically to the work items associated to the Git commit.

What should you do?

- **A.** Modify the Integrations options for the pipeline.
- **B.** Modify the post-deployment conditions for the last stage of the pipeline.
- **C.** Add an agentless job to the pipeline.
- **D.** Modify the service hooks for the project.

Answer: B

Question No. 3

You plan to onboard 10 new developers.

You need to recommend a development environment that meets the following requirements:

Integrates with GitHub

Provides integrated debugging tools

Supports remote workers and hot-desking environments

Supports developers who use browsers, tablets, and Chromebooks

What should you recommend?

- **A.** VS Code
- **B.** Xamarin Studio
- **C.** MonoDevelop
- **D.** Visual Studio Codespaces

Answer: D

Question No. 4

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have an Azure DevOps project.

Your build process creates several artifacts.

You need to deploy the artifacts to on-premises servers.

Solution: You deploy an Octopus Deploy server. You deploy a polled Tentacle agent to an on-premises server. You add an Octopus task to the deployment pipeline.

Does this meet the goal?

- **A.** Yes
- **B.** No

Answer: B

Question No. 5

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

The lead developer at your company reports that adding new application features takes longer than expected due to a large accumulated technical debt.

You need to recommend changes to reduce the accumulated technical debt.

Solution: You recommend reducing the code coupling and the dependency cycles?

Does this meet the goal?

- **A.** Yes
- **B.** No

Answer: B
