Question No. 1

Note: This question is part of a series of questions that present the same scenario. Each question in

the series contains a unique solution that might meet the stated goals. Some question sets might have

more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these

questions will not appear in the review screen.

Your company has an Azure Active Directory (Azure AD) tenant named contoso.com and a Microsoft Intune

subscription.

Contoso.com contains a user named user1@contoso.com.

You have a computer named Computer1 that runs Windows 8.1.

You need to perform an in-place upgrade of Computer1 to Windows 10.

Solution: From Windows 8.1, you run setup.exe from the Windows 10 installation media.

Does this meet the goal?

- **A.** Yes
- **B.** No

Answer: A

Question No. 2

Note: This question is part of a series of questions that present the same scenario. Each question in

the series contains a unique solution that might meet the stated goals. Some question sets might have

more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these

questions will not appear in the review screen.

Your company has an Azure Active Directory (Azure AD) tenant named contoso.com and a Microsoft Intune

subscription.

Contoso.com contains a user named user1@contoso.com.

You have a computer named Computer1 that runs Windows 8.1.

You need to perform an in-place upgrade of Computer1 to Windows 10.

Solution: You start Computer1 from the Windows 10 installation media and use the Install option.

Does this meet the goal?

- **A.** Yes
- **B.** No

Answer: B

Question No. 3

Note: This question is part of a series of questions that present the same scenario. Each question in

the series contains a unique solution that might meet the stated goals. Some question sets might have

more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these

questions will not appear in the review screen.

Your company has an Azure Active Directory (Azure AD) tenant named contoso.com and a Microsoft Intune

subscription.

Contoso.com contains a user named user1@contoso.com.

You have a computer named Computer1 that runs Windows 8.1.

You need to perform an in-place upgrade of Computer1 to Windows 10.

Solution: You assign a Windows 10 license to User1. You instruct User1 to sign in to Computer1.

Does this meet the goal?

- **A.** Yes
- **B.** No

Answer: B

Question No. 4

You have the Microsoft Deployment Toolkit (MDT) installed.

You install and customize Windows 10 on a reference computer.

You need to capture an image of the reference computer and ensure that the image can be deployed to

multiple computers.

Which command should you run before you capture the image?

- **A.** dism
- **B.** wpeinit
- **C.** bcdedit
- **D.** sysprep

Answer: D

Question No. 5

You have a Microsoft Deployment Toolkit (MDT) deployment share named DS1.

In the Out-of-Box Drivers node, you create folders that contain drivers for different hardware models.

You need to configure the Inject Drivers MDT task to use PnP detection to install the drivers for one of the

hardware models.

What should you do first?

- **A.** Create a selection profile
- **B.** Import an OS package
- **C.** Add a Validate task to the task sequence
- **D.** Add a Gather task to the task sequence

Answer: A
