How to Split PDF File Quickly

There are many ways to split PDF pages without cost by making use of free software online. There are security concerns when it comes to sharing sensitive data. This article will discuss the different tools available for users to resolve the issue of splitting PDF with the free PDF splitters that are available on the market, including PDFelement.

Google Chrome: How to split PDF Files

Google Chrome is more than just a browser. You can also split PDF docs using, of course, Google Chrome, which you can easily discover on the internet directly. Does that sound complicated? This isn't at all! It's actually extremely easy and simple. This tutorial will teach you how to make use of Google Chrome to cut pdf files.

Step 1: Install Google Chrome if you do not already have it on your PC already. You can download it from Google's official website.

Step 2. Open the PDF file that you wish to split in Google Chrome. Drop the PDF directly in the open tab in Chrome.

Step 3: Click the "Print" button. Make note that the "Print" button is in the row of buttons that typically is displayed in the Settings tool.

Step 4: Click the "Save as PDF" button under the "Local Destination" section. Enter the required number of pages into the pdf cutter for the new file. For instance, if you input 1-3 then you will be able to save the first three pages as a new PDF file.

Step 5: Click "Save" and then name the PDF file. After that, you can save it on your computer. Repeat the process as necessary to split other pages from the PDF file.

How to Split PDF to Adobe(r)

Adobe(r) Acrobat(r) is an amazing tool that allows you to split PDF files in number of different ways. It is important to note that both the paid and free versions are able to be utilized. To split PDFs, Acrobat users can follow the steps below.

Step 1. Start the PDF file you wish to split in Adobe. Click on the "Tools" button that is to the left of the window.

Step 2: You'll need expand the "Pages" section of the tool panel. Click "Split Document Button."

Step 3: Configure the pages for the file you are creating.

Step 4: "Output Options" to select the save location of the file.

Step 5: Click "OK" to split the file.

The above tools offer one of the most efficient methods for splitting PDF files. But, PDFelement beats them all because of its ease of use user-friendliness, simplicity of use and superior output. PDFelement is also able to offer PDF merging as well as PDF conversions. Benefit from the advantages of PDFelement to separate your PDF to get the exact results you're looking for.

How to split PDF Files? PDFelement

PDFelement is a tool that is tailored to editing after creating PDF documents. With the help of this application, users can create new PDFs using other files, open PDF documents, and then convert them to various other formats. It is also a great tool to sign documents electronically and to validate them. PDFelement is the ideal tool to split PDF pages into distinct documents. It is simple to split documents and it is reliable. Follow the steps below.

Step 1. Launch [Wondershare PDFelement](#) and open the PDF file that you wish to split by pressing the "Open files" button and browsing through your local folders. Drag and drop your files into PDFelement to allow them to be opened.

Step 2. Make use of the Split Tool with a number of buttons on the "Page tab" which will enable users to control PDF pages. These buttons offer the capability to download PDF pages, as well as rotate the page orientation. Click the "Split" button to split the PDF document.

Step 3. Split PDF Pages once a new window will appear. In this window, you'll be able to select the page number or top-level bookmarks you want to split. When you're satisfied with your selection then click "OK" to finish the process. You'll see the new PDF files saved in the output folder.

Page Number: In this box, you can input the page number of the PDF file. If your PDF is comprised of 10 pages, and you'd like to divide the file into two, you can choose 5 pages in the box for Maximum Pages. The program will turn every 5 pages into separate PDF files, so you'll end up with 2 PDF files that contain 5 pages each.

Top-level Bookmarks: In case your PDF document has bookmarks that mark every section, you may use this feature. It can help you divide PDF pages into separate files based on the way the bookmarks are set up.
